

Nov 7, 1971

Dear Mom & Dad,

It is sunny, but quite windy and cold today. Just last Tuesday it was 85° and we slept with the fan on. Then it turned cold and we have had heavy frost.

Yesterday we got our passport applications sent in and last week had our smallpox vaccination. I'm sending you the description of our tour - it is really quite surprising how many things we will get to see. Our biggest concern right now is how to keep warm!

There was a picture in our paper of a skier at Crystal Mt. It looks like ~~at~~ a lot of snow for early November. Later,

Jim
